Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)				
	10/665,734	PEDERSON ET AL.				
Office Action Summary	Examiner	Art Unit				
	Porfirio Nazario-Gonzalez	1621				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status

DETAILED ACTION

Cross-Reference to Related Applications

Applicants identify this application as a Divisional application of application Serial No. 10/295,773 in the Remarks filed May 14, 2004. However, the preliminary amendment to the specification, filed September 16, 2003, indicates the instant application to be a continuation application of application Serial No. 10/295,773. Further, the record indicates that application Serial No. 10/295,773 was never subjected to a restriction requirement. Therefore, the Examiner will treat this application as a continuation application of application Serial No. 10/295,773.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 3-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,620,955. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 3 is generic to all that is recited in claim 1 of the '955 patent. Particularly, the "metathesis-active metal carbine complex" reads on the ruthenium or osmium carbene complex of the formula X¹X²L¹L²M=CR¹R² recited on claim 1 of the '955 patent. Thus, claim 3 is fully

Application/Control Number: 10/665,734

Art Unit: 1621

anticipated by claim1 of '955 patent. Claims 12 and 17 are subgeneric to all that is recited in claim 1 of the '955 patent. Particularly the instant claims are limited to a method of preparing a ruthenium complex whereas claim 1 of the '955 patent recites a method for preparing ruthenium or osmium complexes. Note that in both, the application and the patent, utilizes a metal carbene of the formula X¹X²L¹L²M=CR¹R². Therefore, it would be obvious to one skilled in the art to use a ruthenium metal carbene precursor, as taught in the '955 patent, for the preparation of the ruthenium complex. As for the instant claims 4-11, 13-16, 18 and 19, the particular substituents in the internal olefin precursor, as well as solvents and additives to the reaction mixture, are taught in the '955 patent and therefore it would have been obvious to one skilled in the art to choose said substituents, solvents and additives with the expectation of obtaining the intended product as taught by the '995 patent.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Porfirio Nazario-Gonzalez whose telephone number is 571-272-0641. The examiner can normally be reached on Mon.-Fri. (9:30 AM - 6:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann R. Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
